

Safety Disclaimer – Thrust Stand and Power Analyser

This product is intended for testing electric motors and power systems in a controlled environment. Please read and follow all safety precautions. **Use at your own risk.**

Important Safety Warnings

- **Dangerous moving parts** – Spinning propellers can cause serious injury. Always handle with extreme care.
- **Props can shatter** – High-speed rotation may cause props to break apart. Do **not** use damaged or unbalanced props.
- **Secure setup** – Firmly attach the thrust stand to a stable, immovable surface before operation. An unstable stand is extremely dangerous.
- **Keep clear of the propeller** – Never touch or reach near the spinning prop. Keep body parts, loose clothing, tools, and other objects clear at all times.
- **Power wiring** – Ensure all power wires and leads are secured **away from the propeller arc**.
- **Personal protection** – Always wear **safety goggles** or **face protection** when operating the device.
- **Children and bystanders** – Keep the area clear of children and untrained individuals.

Disclaimer of Liability

By using this product, you agree to assume all risks associated with its use. The manufacturer and seller are **not liable** for any injury, damage, or loss resulting from improper use, mishandling, or failure to follow safety precautions.
