AVATAR GT2 KIT

[Learn More](#)

Upgraded & Optimized

New Avatar GT2

- **All-New Integrated Design**
22ms Low Latency | Ultra-Long Range
- **Smart Power Control**
Auto & Multi-Level Modes
- **30%+ Lower Power Consumption**
No Overheating | 16W Peak & 1mW Standby | Extended Battery Life
- **Smart Frequency Hopping**
Seamless Switching
Stable in Complex Environments
- **New Type-C Port**
Plug & Play | Fast HD Media Reading
- **Extended Antenna**
Upgraded MMCX | Strong Signal & Highly Durable

VS

Avatar GT

- **Classic Integrated Design**
Unnoticeable Latency
Standard Range HD
- **Standard Power Output**
Baseline Stable Signal
- **Standard Standby Power**
Controlled Heat | Everyday Battery Life
- **Basic Manual Tuning**
Stable for Daily Use
- **Traditional Data Port**
External Card Reader Required
- **Standard Antenna**
Stable Short-Range Signal

Ultra-Low Latency & Efficiency

Building on its predecessor's strengths, the GT2 fully upgrades transmission performance and reliability—delivering 22ms ultra-low latency and up to 20km of HD digital range

Frequency Hopping Fast, Stable, Smart

Supports fixed and frequency-hopping modes. Actively scans and seamlessly switches channels in milliseconds to bypass interference, delivering stable, uninterrupted video

Head-Tracking Ready

Works with CaddxFPV GM Gimbals & Walksnail Avatar Goggles. Instant head movement response for a true cockpit feel. No soldering needed

All-New Integrated Design

Metal Body

Solder-Free

Active Cooling

Ultimate FPV Visuals

Extended Antenna Connector
